

Mapping Police Violence collected data on over **1,100 killings by police in 2021**. We compiled this information from media reports, obituaries, public records, and databases like Fatal Encounters and the WashingtonPost. Despite the federal government's efforts to create a national database on this issue, their Use of Force Data Collection program is **expected to shut down** this year because fewer than 60% of the nation's law enforcement reported data to the program. **As such, this report represents the most comprehensive public accounting of deadly police violence in 2021.** Our analysis suggests the majority of killings by police in 2021 could have been prevented and that specific policies and practices might prevent police killings in the future.

Scroll to explore the findings.

1,134 people were killed by police in 2021.

More people were killed by police in 2021 than almost any other year in recent history.

97% of people killed by police in 2021 were killed by police shootings. Tasers, physical force, and police vehicles accounted for most other deaths.

Each year, **fewer than 3% of killings by police result in officers being charged with a crime**. Officers are disproportionately prosecuted by Black prosecutors — **especially Black women**. Representing only **1%** of the nation’s elected prosecutors, Black women were **9%** of prosecutors who charged officers for killing someone, **13%** of prosecutors convicting officers and **20%** of prosecutors charging officers in two or more deadly force incidents from 2013-2021.

- White Male
- White Female
- Black Male
- Black Female
- Hispanic Male
- Hispanic Female
- Asian Male
- Asian Female
- Other

We were able to identify officers in **434** cases. At least **16** had shot or killed someone before. **5** had multiple prior shootings.

- Officers identified (434)
- Officers with one prior shooting (11)
- Officers with two or more prior shootings (5)
- Officers not reported/unable to be identified (700)

Most killings began with police responding to **suspected non-violent offenses** or cases where **no crime** was reported. **117** people were killed after police stopped them for a traffic violation.

- Suspected non-violent offense or no reported crime (555)
- Traffic violation (117)
- Unknown (69)

In February 2021, the City of Berkeley enacted a new policy meant to restrict police from enforcing some traffic violations, including equipment violations like expired tags or tinted windows. While stops for equipment violations have declined since then, overall police traffic enforcement has not reduced substantially - indicating the need for more expansive restrictions on police traffic enforcement.

104 people were killed after police responded to reports of someone behaving erratically or having a **mental health crisis**.

- Mental Health/Welfare Check (104)
- Domestic Disturbance (72)
- Person with a Weapon (97)
- Violent Crime (393)
- Traffic Stop (117)
- Other Non-Violent Offense (201)
- Other Crimes Against People (67)
- None/Unknown (83)

Programs that **send mental health providers instead of police** to mental health-related 911 calls are beginning to be **scaled up in some cities. Here are some examples, according to the latest data reported:**

Eugene, OR: CAHOOTS program responds to **40% of mental health or disorderly persons calls citywide**

San Francisco: Street Crisis Response Teams respond to **10% of mental health-related calls citywide**

Portland: Street Response Teams responds to **23% of unwanted persons, suspicious persons, and non-emergency welfare check calls in designated neighborhoods**

Denver: STAR program responds to **29% of welfare check, disturbance, suicidal or intoxicated persons calls in designated neighborhoods**

78 people killed by police were **unarmed**.

- Unarmed (78) ■ Vehicle (55) ■ Knife/sharp object (161)
- Other object (71) ■ Gun (656) ■ Undetermined (113)

Most **unarmed** people killed by police were **people of color**.

- Black (27)
- Hispanic (21)
- Asian/Pacific Islander (1)
- White (23)
- Unknown (6)

Black people were **more likely to be killed** by police, more likely to be **unarmed** and **less likely to be threatening someone** when killed.

Police disproportionately kill Black people, year after year.

55 people killed by police had a vehicle as a weapon.

- Unarmed (78)
- Vehicle (55)
- Knife/sharp object (161)
- Other object (71)
- Gun (656)
- Undetermined (113)

49 of these people were killed when police shot at a moving vehicle, a practice many experts say should be **banned**.

■ Vehicle, Killed by Police Shooting (49) ■ Killed by Police Vehicle (1)

Experts, law enforcement groups, and the US Department of Justice recommend that police be **banned** from shooting at people in moving vehicles. These shootings are particularly **ineffective** and **dangerous**, since shooting the driver can make the vehicle an uncontrollable threat to both officers and the public.

Despite this, **most police departments continue to allow officers to shoot people in these situations.**

161 people killed by police were allegedly armed with a **knife**.

- Unarmed (78)
- Vehicle (55)
- Knife/sharp object (161)
- Other object (71)
- Gun (656)
- Undetermined (113)

In many countries, police routinely disarm people who have knives **without shooting them**. In 2021, there were **2 fatal police shootings** in all of the United Kingdom, a country of 67 million people where police encounter knife attacks at a **similar rate** as US police. In Los Angeles alone, a city of 4 million people, LAPD officers fatally shot 8 people allegedly armed with knives in 2021.

Half of those killed by police **were** reportedly armed with a gun.

- Unarmed (78)
- Vehicle (55)
- Knife/sharp object (161)
- Other object (71)
- Gun (656)
- Undetermined (113)

But **1 in 8** people with a gun were not threatening anyone when they were killed. They might have been **de-escalated** instead.

- Gun, allegedly threatening someone (555)
- Gun, not alleged to be threatening someone (82)
- Guns, undetermined (19)

57% of killings by police in 2021 — 606 deaths — were **traffic stops**, police responses to **mental health crises**, or situations where the person was not reportedly threatening anyone with a gun. Creating alternatives responses to these situations could substantially reduce this violence nationwide.

- Mental Health/Welfare Check (104) ■ Traffic Stop (117)
- Person Not Alleged to be Threatening with a Gun (385)
- Undetermined (72)

Which would mean substantially **fewer people** killed by police in **almost every city.**

- Zapata Sheriff's Office ■

Together, we can end police violence.

This project was built with help from activists, researchers, and volunteers from across the country.
